GUTTER COVERS INTERNATIONAL, LLC

Gutter Topper®

When It Pours, It Reigns®

Tested and Proven to be the best!

Gutter Topper® is made of 100% quality aluminum and is 0.024 inches thick. Its patented design works to keep gutters clear and free flowing. The Gutter Topper® installs over existing gutter with a clip-on system that hooks to the outside of the gutter. The interlocking design allows for water to flow freely into the gutter directly while leaves and debris fall to the ground.

Gutter Topper® underwent some of the most rigorous testing by PRI Technologies the leading independent testing firms for the nation's top ranked roofing and construction companies. The testing results received were overwhelming. The test revealed without any doubt that the Gutter Topper® can:

- Withstand winds up to 110 mph
- Rainfall of 22 inches per hour
- Hold upto 1200 lbs. per square ft. which means heavy snow and ice will not affect its performance.

The Gutter Topper's® patented design protects your property by eliminating the problems associated with clogged gutters. Gutter overflows can quickly cause damage to landscaping, ruin basements and destroy the foundation of a home or structure. Improperly cared for gutters can also lead to other serious and possibly more unnoticeable problems including, but not limited to mold, mildew, and rot.

With all the protection to your home, Gutter Topper® will also add to the curb appeal. The cover custom

Available in 13 colors

Popular Roof Styles

fits to your gutters and is available in 13 colors including a 16 oz. copper model. Our product blends directly into your existing gutters with easy installation, no mounting brackets or hangers for that seamless look to your home or structure that you desire. It's compatible with all roof styles and comes with a diverter designed to allow water to flow properly into the gutter system.

In addition, not only do you increase the value of your investment, you eliminate the task and risk of gutter cleaning. More than 100,000 people a year suffer serious injuries from falls while on a ladder, the majority of these occur at heights as low as 10ft, the height of a single story home. The average cost of an injury from a ladder fall is \$4,000 that is just upfront cost of hospital stays,

prescriptions and physical therapy. Long-term injuries and costs due to falling off a ladder can also add up to thousands more. Be prepared. Get Gutter Topper®.

Gutter Topper® has a twenty year transferable paint finish warranty against chipping or blistering. It has a transferable lifetime performance warranty.
